THE COLLECTION

KELLY WEARSTLER

Global interior designer and tastemaker, Kelly Wearstler, is renowned for her signature brand of unexpected, bold and chic design. Her iconic and pioneering body of work encompasses interior projects, hotel design, product design, and partnerships with some of the industry's leading names. Wearstler has revolutionized the look, feel and meaning of modern American living.

This season marks the debut of Kelly's first furniture collection: nearly 50 designs inspired by her masterful mix of diverse materials, artisanal

craftsmanship and classic forms. Heirloom woods, mixed metal patinas, and hand-cut stones combine with a sophisticated palette, clean lines and sculptural forms to create a collection with Kelly's distinctive vision.

Each piece carries a singular voice, while a shared vocabulary enables the designs to fill a space harmoniously. They are modern classics: marrying form and function with unrivaled artistry and enduring quality.

I like tension — having something raw and refined in the same room. Tension can come from two separate objects, or, even better, both qualities can exist in a single piece.

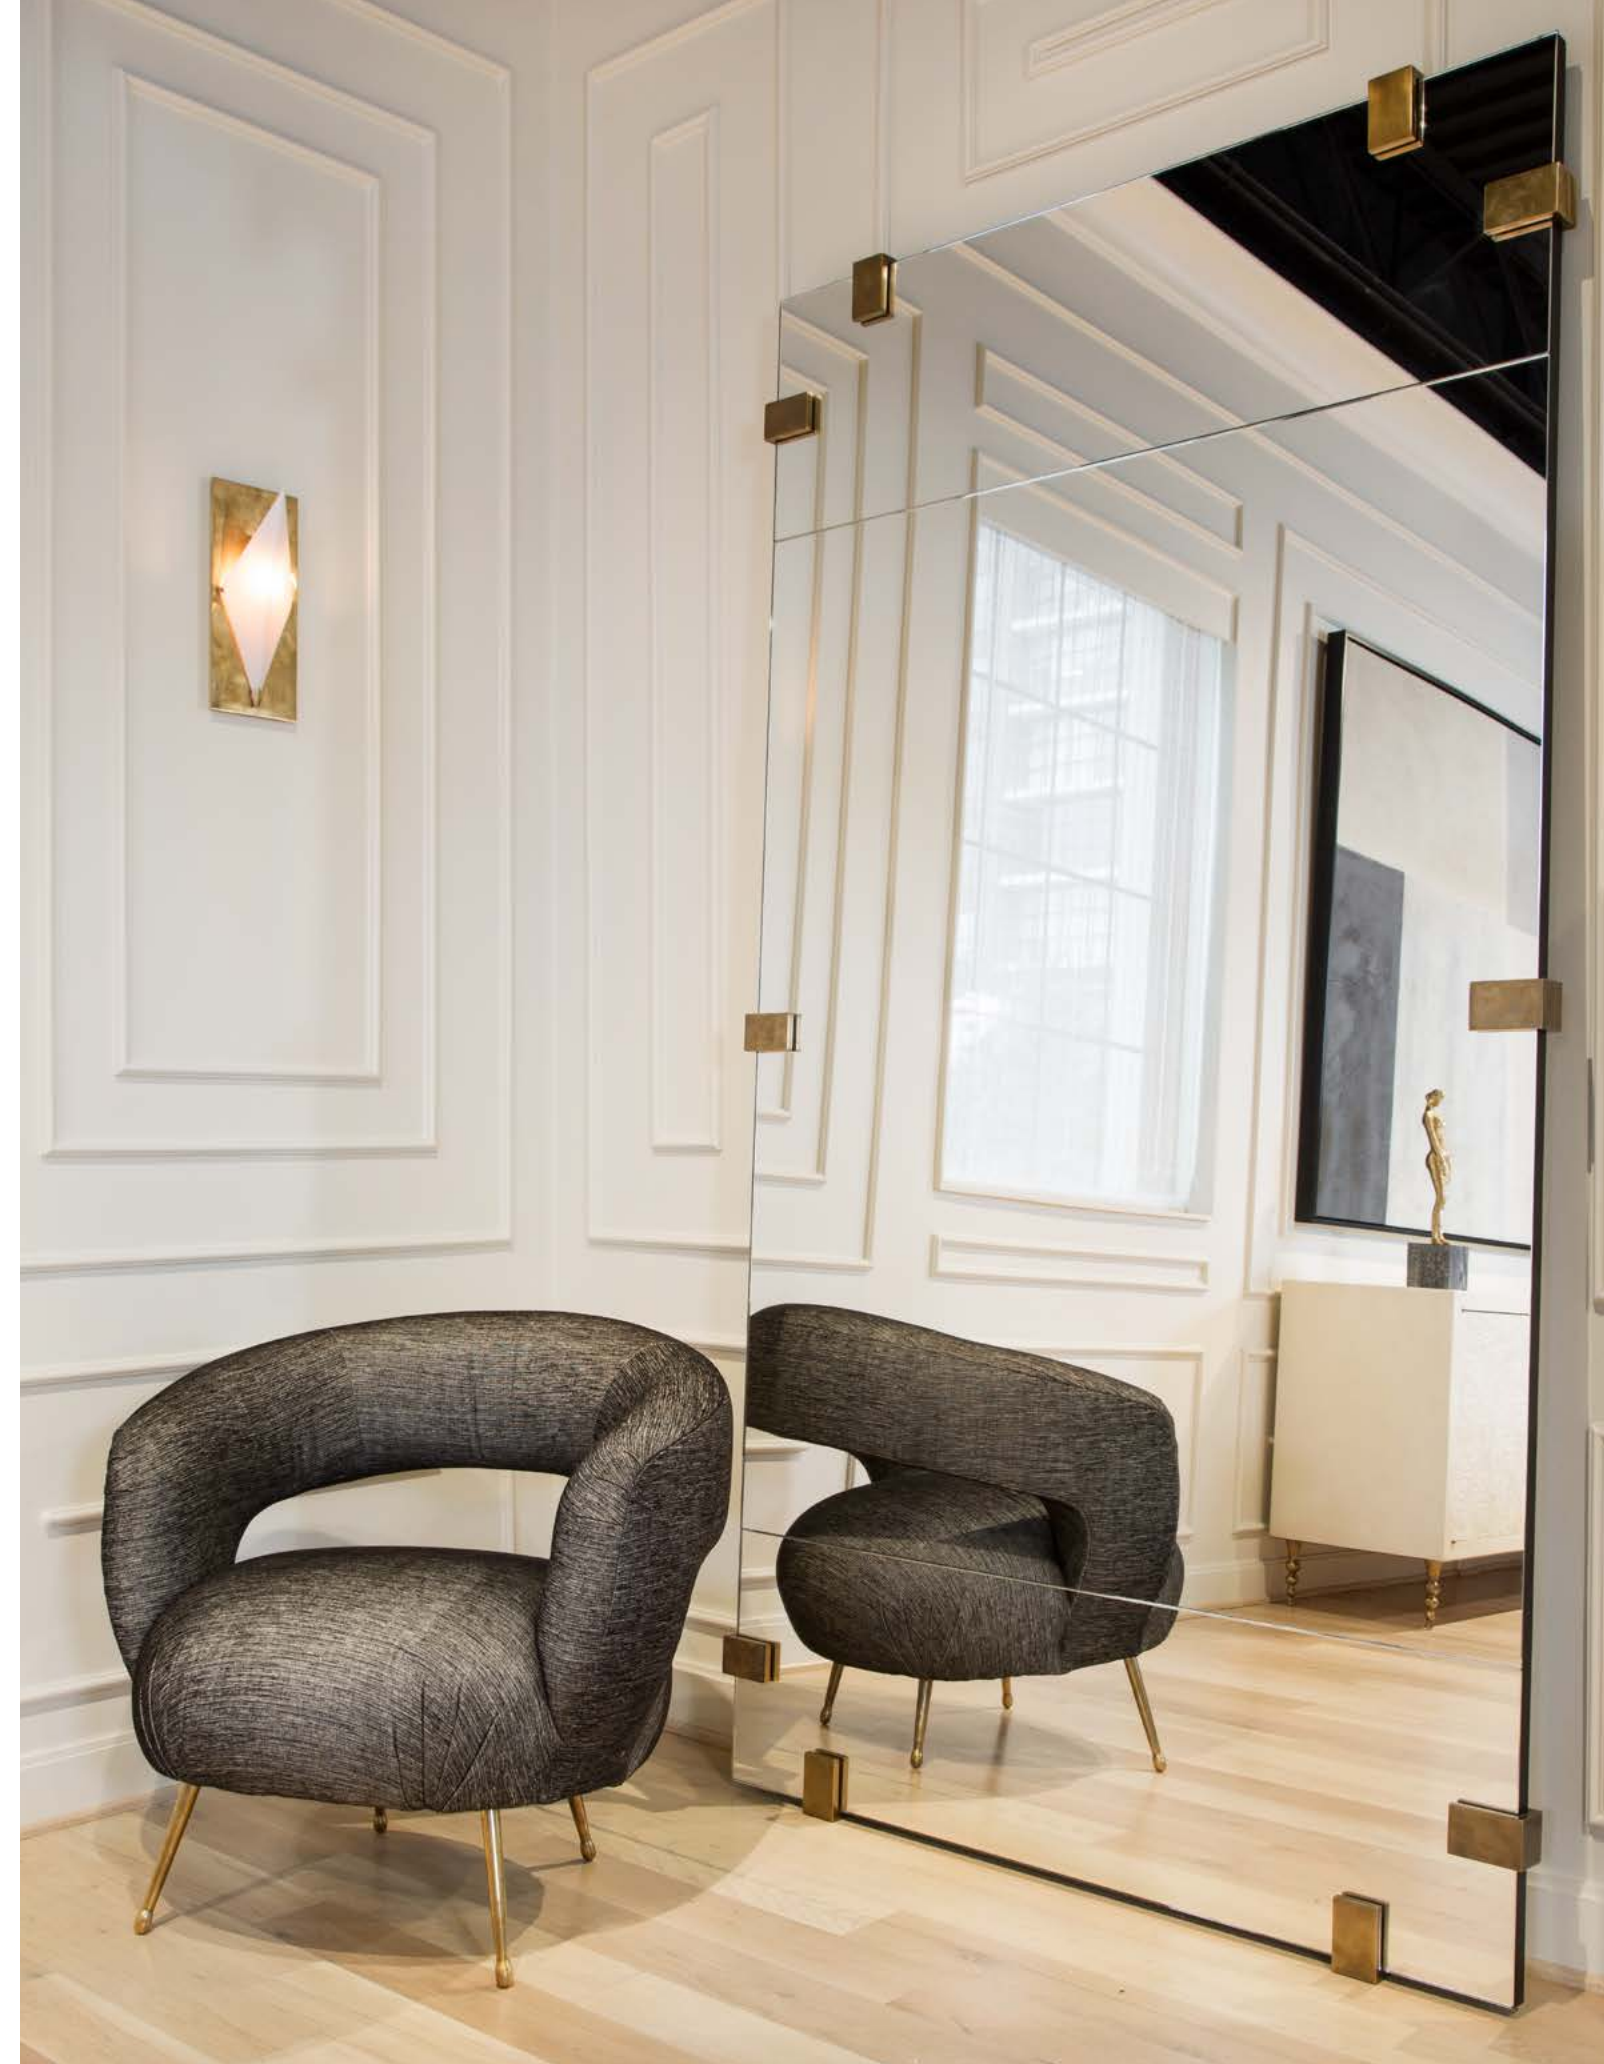

The eye should be captivated
by every view of a space, whether
by a dominating architectural
feature or a moveable tablescape.

Furniture provides the foundation for treasured and personal objects to be showcased. Arranged with care to add emotion to a given space, creating a captivating vignette or a beautiful mise-en-scène.

The shape of something, the way one's eye and spirit reacts to it, is as important to the soul of a room as the color of its walls. Whether it's the soft curve of a female nude, the sharp edges of an art deco chair, or the geometric pattern of a marble floor, our visual senses are constantly absorbing the ebb and flow.

I have a long-standing love affair with metal. It is glamorous and sexy, rich, raw and evocative. Take risks and mix metals. Doing so gives depth to a space that is otherwise impossible.

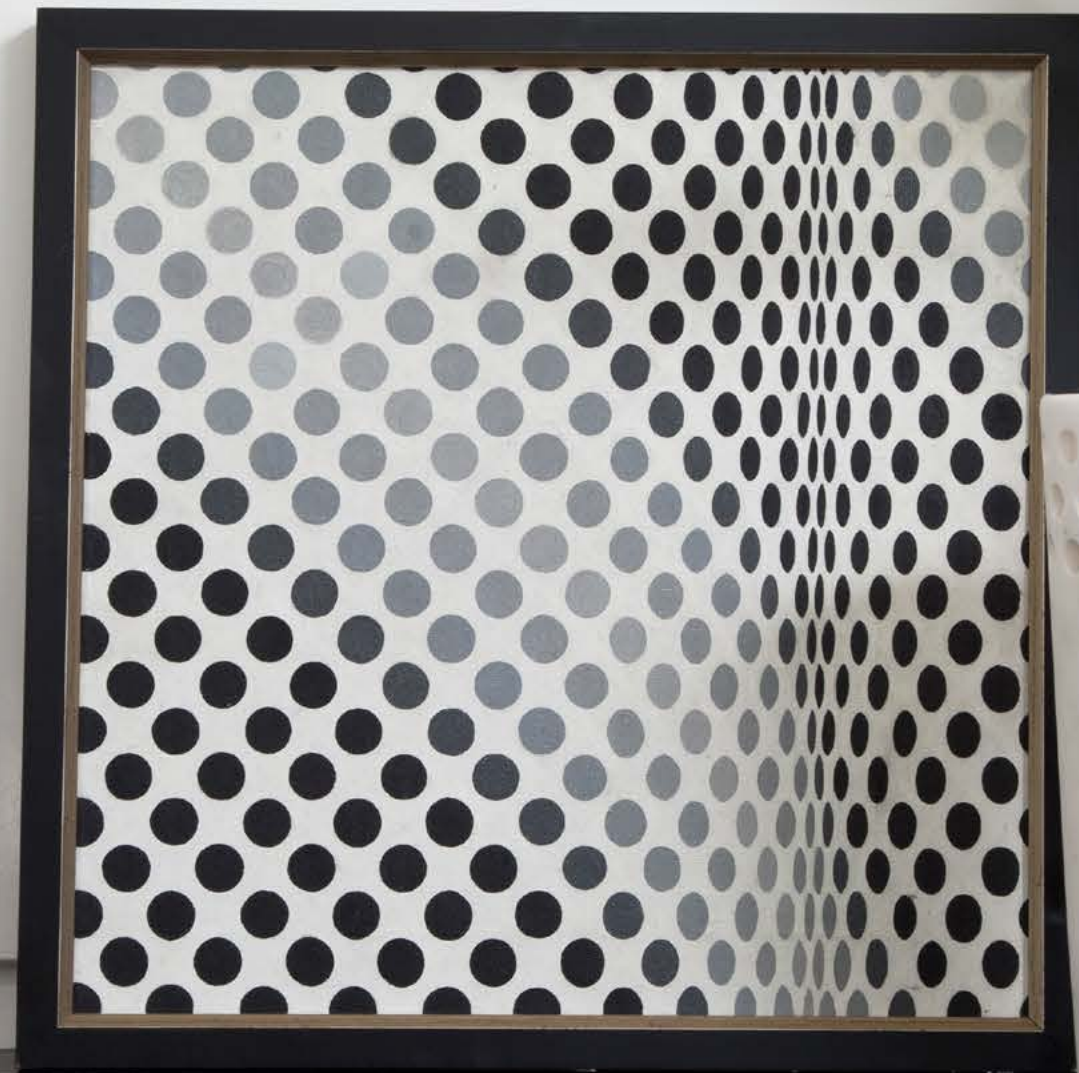

Proportion and scale can be used in unexpected ways to create balanced and dynamic spaces; both big and small.

Monochromatic environments are deceptively simple. They require a huge measure of creativity to achieve a calming, yet impactful effect. Let the spirit guide you. Follow it.
